Paging Microphone

Under development, specifications subject to change.

The Smart pi MIC is a PoE-powered paging microphone panel for the Smart pi ECOsystem. It is configured in and fully integrated with the Smart pi DSP, or can be configured standalone via its own web page.

Nine physical buttons plus touch control make it quick to select zones and make announcements. A high quality microphone and pre-amp deliver clear speech, and the built-in speaker lets operators monitor destinations and talk back.

Dante audio-over-IP carries audio on the local network, while SIP with the OPUS codec connects panels over wide area networks. PoE loop-through lets several panels share a single switch port.

Features

- 9 physical buttons plus touch control
- Dante audio-over-IP; SIP (OPUS) for wide area
- AES70/OCA control; PoE with loop-through
- Built-in DSP, speaker and talkback
- Multiple language labels
